

A COROS RETREAT WITH  
**DENNIS KLOCEK**  
 CO-SPONSORED AND HOSTED  
 BY RUDOLF STEINER COLLEGE  
 MARCH 22-24, 2013

# Family of Origin

transforming inherited beliefs

The issue of inherited beliefs lies at the center of the task of self transformation. Inherited beliefs create neuronal patterns that result in unconscious flight or fight responses in humans, resulting in illness. Recent brain research reveals great potentials for neurogenesis (the generation of new neurons) as a powerful tool for healing. Using the principles of neurogenesis as a starting point, we will work with communication and visualization exercises to explore the transformation of inherited beliefs. Small group and dyad work will accompany lecture presentations and meditative exercises.

**Topics include:** the neurological basis of social dysfunction, neurogenesis through creative activities for adults, meditative exercises for linking to departed souls, storytelling and biography, and legends of the family of origin concerning space and time management.

Dennis Klocek, Co-founder of the Coros Institute, is the Director of Consciousness Studies, a study of alchemy and transformation, at Rudolf Steiner College. Author of seven books including, *Climate — Soul of the Earth* and the soon-to-be-released *Biodynamics: An Alchemical Path*. Also known as an international lecturer, see [www.dennisklocek.com](http://www.dennisklocek.com)
